Shaw Road East natural gas main replacement project

January 12, 2018

You should have received a notification letter in May 2017 about a natural gas replacement project in collaboration with the city's work on Shaw Road East. Due to unforeseen circumstances, Puget Sound Energy has decided to break the work up into multiple phases. The second, and final phase, of the natural gas work will begin soon. This work entails replacing segments of the existing underground natural gas pipeline with new, corrosion-resistant plastic pipe. We're committed to completing the work with as little inconvenience to you as possible. Please see below for project details.

Work details

Who: Natural gas crews from PSE and InfraSource
What: Replacing the underground natural gas main
When: Work is expected to begin the week of January 15 and last approximately six weeks.

- Work schedule depends on weather and crew availability
- Work hours: Monday through Friday, 9 a.m. – 3 p.m.
- Some periodic night work may be expected

Where: Portions of Shaw Road East between 26th Avenue Southeast and Manorwood Drive Southeast, Puyallup (please see map on reverse)

Sewer safety

If our project involves being underground near your sewer or septic lines, we will conduct a follow-up inspection of your lines by inserting a camera through them. Although our installers take care to avoid sewer and septic lines, on rare occasions, a gas pipeline is inadvertently installed through those lines, which are often not mappable or detectable using above-ground sensors. This inspection verifies your sewer is clear of a gas line. Visit pse.com/sewersafety for information about PSE's work with Hydromax USA to prevent cross bore danger.

What you can expect

- Signs and traffic control flaggers will guide vehicles through the work zone
- There will likely be noise from trucks and heavy machinery
- **Some customers may experience a short interruption of natural gas service during this time.** We will notify impacted customers prior to beginning work requiring an interruption in service
 - If you are home when the work is complete, a technician will reconnect your natural gas service and complete safety checks on your gas appliances immediately
 - If you are not home when the work is complete, please give us a call at **1-888-225-5773** and a technician will be out as soon as possible to reconnect your natural gas service
- This work should not impact electric service in the area

We are proud to serve in your community and aim to complete the work with as little disruption as possible. If you have questions or concerns, please contact me at the phone number or email listed below and reference project **#109100451**. Thank you for your patience during this project.

Sincerely,

Amber Uhls, Project Manager
